

QUALITY POLICY

Document No: POL-001

It is the policy of P2ML to provide its customers, other stakeholders and interested parties with services which comply in all respects with their agreed requirements and which integrate with their stated expectations and needs.

The Directors are committed to satisfying the requirements of ISO9001:2015 and implement its quality objective through the operation of a Quality System in compliance with the standard. The Quality System includes measurable quality management objectives, policies, organisation and procedures associated with all relevant Company activities. The effective operation of the Quality System throughout the company requires the exercise of individual responsibility by each person.

P2ML operates a policy of continuous quality improvement which relates to the personnel, materials, equipment and systems employed within P2ML. This policy is integrated with the operation of the Quality System and applies to internal processes as well as external services for the Customer.

As part of this Quality Policy, the Quality Representative has the responsibility and authority to develop, co-ordinate and monitor the implementation and effectiveness of the P2ML Quality System.
